

Drone Career Possibilities

SCIENCE

- Climate change and weather control
- Forest Regeneration
- Assessing Lands After Natural Disasters

TECHNOLOGY

- UAS Pilot
- Drone Repair Technician
- Programming/Coding

ENGINEERING

- Drones for First Response
- Director of Autonomous Drone & AI
- Mapping & Tracking

ARTS

- Videography Image Series
- Aerial photography
- Concept & Story development

MATHEMATICS

- Data Systems
- Back-End Developer
- Real-World Problem Based Challenges

FOUNDER'S MESSAGE

STEAMed Drones believes high expectations trump all personal obstacles.

Adolescents must acquire "a deep belief in their dignity, worth and own somebodiness (Martin Luther King Jr)." In doing so, young people achieve their highest self.

We know this to be true for our CEO, Stevenson Demorcy. He is an Immigrant-American who utilized the STEAM pipeline to transition from ELL/ESL to Special Education, General education to Honors/Advanced Placement, and later achieved his degree in Mathematics with a Certificate of Eligibility with Advanced Standing in education (CEAS).

Full STEAM ahead!

Stop Putting Limits & Reach.

AN OVERVIEW OF THE STEAM CURRICULUM

SCIENCE

- FAA Laws and Regulations
- Current Industry of Drones
- Various Drone Types
- Vertical Takeoff Landing
- The Physics of Flight

ENGINEERING

- Future Drone Industries
- Emergency Drones
- The Transport Drone Industry
- Firefighting Drones
- The Military Drone Industry
- Agriculture Drones

MATHEMATICS

- Graphing
- Data Recording & Analysis
- Calculating One-Step Equations
- Discovering Angles & Measures

Email:
info@STEAMedDrones.com

TECHNOLOGY

- Manual Pilot
- Coding Pilot Introduction
- Interscope Pilot Introduction
- Discover Components of Drones

ARTS

- Building The Delivery Map
- Video Recording & Editing
- Aerial Photography
- Drone Design

STEAM PROJECTS

Emergency Response Projects:

- The Coyote Problem
- Chilean Earthquake
- The Deep Dive
